### **DETAILED ACTION**

This restriction is in response to the Preliminary Amendment filed on September 04, 2003, Paper No. 9.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-25, drawn to a composition comprising a recombinant adenovirus, classified in class 435, subclass 235.1.
- II. Claims 26-39, drawn to a method for producing an immune response against HIV-1 infection, classified in class 424, subclass 233.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used to treat or induce an immune response against hepatitis B, hepatitis C, human papilloma virus, respiratory syncytial virus, rotavirus, or parainfluenza virus.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
